

Geoscience in South-West England

Instructions for Authors

We welcome the submission of papers related to any aspect of the geology or geomorphology of South-West England and related geographical areas, along with papers of broad interest and significance to geologists and geomorphologists working in South-West England. Authors benefit from the provision of free pdf copies of their published papers for free distribution, along with the opportunity to publish in colour. By submitting papers to the Journal authors support the Society's activities.

Papers

1. We welcome the submission of papers related to any aspect of the geology or geomorphology of South-West England and related geographical areas, along with papers of broad interest and significance to geologists and geomorphologists working in South-West England.
2. Manuscripts, which should be unpublished original works, will only be accepted for publication following double refereeing.
3. Manuscripts should be word processed and submitted electronically together with figures as separate files. The text should be double spaced throughout including references, figure captions, tables etc.
4. Final manuscripts, after the reviewing process, must also be submitted electronically.
5. Papers must be laid out as in the current issue of *Geoscience in South-West England* (but not in double column format).
6. Figures should be clearly marked with the author's name and figure number. Authors should design their figures to be produced as either single column (87 mm) or double column (179 mm). When preparing a full page or full column figure then space for the figure caption should be allowed for within the total page depth of 252 mm. Electronic figures should be produced, if at all possible, as TIFFs or best quality JPEGs at high resolution (minimum 600 dpi) and scaled appropriately for reproduction as either single or double column figures. Images should be the size they are to print or larger.
7. Authors are urged to consider the use of colour in their figures, where the subject matter scientifically merits the use of colour. Electronic images should be CMYK (not RGB) or Greyscale.
8. Tables should be produced on separate pages and have an explanatory caption.
9. References in the text are given as author(s) and year, i.e. (Evans, 1961; Smith and Jones, 1990) or Evans (1961) etc. Papers with more than two authors are cited as *et al.*, i.e. (Jones *et al.*, 1989). In the list of references the order should be alphabetical with papers by the same author being arranged in the order (1) single author, (2) two authors alphabetically according to the name of the second author, and (3) several authors, chronologically with a, b, c etc for papers published in the same year.
10. The format of the reference list is as follows: author(s) surname(s) and initial(s), year of publication, full title of article, title of journal, volume number and page numbers, e.g. GREEN, D.H. 1964. The petrogenesis of the high temperature peridotite intrusion in the Lizard area, Cornwall. *Journal of Petrology*, **5**, 134-188. Author(s) and editor(s) names in FULL CAPITALS; Journal, book or thesis title in *italics*; volume numbers in **bold**. References to chapters in books or special publications should follow the following format: EGGLER, D.H. 1987. Solubility of major and trace elements in mantle metasomatic fluids. Experimental constraints. In: MENZIES, M.A. and HAWKESWORTH, C.J. (Eds), *Mantle metasomatism*. Academic Press, London, 21-39. For a published book: SMITH, J.V. 1974. *Feldspar minerals, Volume 2 - chemical and textural properties*. Springer-Verlag, Berlin. For an unpublished thesis: SHEPHERD, A. 1986. *The geochemistry and evolution of the Lizard Complex, Cornwall*. Unpublished PhD thesis, University of Nottingham. References to material on a website should follow the following format: INTERNATIONAL COMMISSION FOR STRATIGRAPHY 2014. Timescale Version 2014-02. <http://www.stratigraphy.org/ICSchart/ChronostratChart2014-02.pdf>, last accessed on 14th December 2014.

Abstracts

The abstracts of papers/posters presented at the annual meeting, but not submitted as full papers, will be published in the journal following minor editorial corrections.

General

Manuscripts and editorial enquiries should be directed to the editor. Proofs will be sent to the corresponding author before publication, for checking and minor corrections. Major alterations to the original submitted manuscript will only be accepted at this stage at the author's expense. PDF copies of published papers will be made available free of charge to the authors. For further information please contact the editor: Professor Malcolm Hart, School of Geography, Earth & Environmental Sciences, Plymouth University, Drake Circus, Plymouth PL4 8AA, UK.
